ETG commercial & pricing cockpit (case study)

A daily monitoring and pricing workbook for a multi-brand B2B travel platform. Independent case study - not affiliated with or endorsed by Emerging Travel Group.

What is real, what is simulated

SIMULATED	All bookings, partners, suppliers, prices, margins and price-match requests (fixed seed 42). They are NOT Emerging Travel Group data; names are fictional codes.
PUBLIC DATA	FX rates in the FX table are real ECB reference rates. Demand seasonality used by the simulation comes from Eurostat. Sources: data/SOURCES.md.

Sheet	**What it does**
Cockpit	Daily KPIs vs day before, same day last year, previous 7-day average and an expected value (same weekday, 4 weeks). By brand, line of business, partner type, supplier type, source market, destination, top 10 partners. Built only with CUBEMEMBER / CUBEVALUE / CUBESET / CUBERANKEDMEMBER on the data model. Change the yellow cells.
Pivots	PivotTables connected to the data model with slicers (line of business, market, partner type, destination, partner tier, channel). Supplier margin by month. Real ECB FX by month.
Alerts	Statistical alert band with SUMIFS / LET / INDEX / STDEV.S on tblDaily. Choose dimension, member and metric. Same rule as the Python and SQL code. Alert days listed with FILTER.
Bridge	Margin change between two months split into volume, mix, price, FX and cost, with dynamic arrays (UNIQUE, SORT, SUMIFS on spilled ranges) and a waterfall chart. Check cell must be 0.
PriceMatch_Calc	Calculator for a partner's price-match request: evidence, like-for-like adjustments (taxes, breakfast, cancellation), margin floor, maximum discount, decision, reply text.
PriceMatch_Log	1,347 requests with KPIs (COUNTIFS, SUMIFS, SUMPRODUCT, MEDIAN). A LET formula re-applies the rules to every row: 'Rule check' shows how many rows agree.
Pricing	Markup recommendations by B2B segment with the expected margin effect for a range of price elasticities (change the yellow cells).
Data_Quality	Issues found in the raw ledger (duplicates, missing costs, time-zone shift) and their effect on daily totals.
Data_Daily / Data_Monthly	Aggregated tables (tblDaily, tblMonthly) used by the formula sheets.
Partners_Suppliers	Dimension tables (fictional codes).
Lists	Values for the drop-down lists.
Data model (Power Pivot)	**Tables: Bookings (clean ledger, ~192k rows), Calendar, Suppliers, Partners, FX. Relationships: Bookings[booking_date] -> Calendar[date], [supplier_id] -> Suppliers, [partner_id] -> Partners, [fx_key] -> FX. About 50 DAX measures (Data > Manage Data Model > Measures).**
Definitions	Sales = selling price after discount, EUR, on the booking date. Margin = sales - supplier net cost. Margin rate = margin / sales. Cancellations are counted on the cancellation date. Expected = average of the same weekday over the previous 4 weeks.

Refresh	The data is stored in the file: no refresh needed. To reload the CSV files, open Data > Queries & Connections and update the folder path in each query, then Refresh All.

SIMULATED data (seed 42), not Emerging Travel Group data. Independent case study based on public data - not affiliated with or endorsed by Emerging Travel Group.

Daily commercial cockpit

SIMULATED DATA

Pick a day, a brand and a line of business. Every number below is a CUBE formula reading the Power Pivot data model (measures in DAX).

Day	2026-09-15	Tue
Brand	All	
Line of business	All	
Thresholds:	25%	volume gap vs expected
	1,5%	margin-rate drop (pts)
	4,0%	margin floor

Metric	Selected day	Day before	vs D-1	Same day LY	vs LY	Prev. 7-day avg	Expected*	vs expected	Status
Bookings	380	405	-6%	343	+11%	354	418	-9%	OK
Sales (EUR)	123 037	137 922	-11%	113 569	+8%	119 545	140 719	-13%	OK
Margin (EUR)	9 461	10 704	-12%	8 797	+8%	9 333	10 565	-10%	OK
Margin rate	7,7%	7,8%	-0,1%	7,7%	-0,1%	7,8%	7,5%	+0,2%	OK
Room nights	1 034	1 104	-6%	916	+13%	951	1 102	-6%	OK
Avg booking value (EUR)	324	341	-5%	331	-2%	338	337	-4%	OK
Cancellations (by cancel date)	68	82	-17%	68	0%	75	80	-14%	OK

* Expected = average of the same weekday over the previous 4 weeks (handles the weekly pattern). LY = same weekday 52 weeks earlier (364 days).

Price-match request calculator

Enter the request (yellow cells). The sheet checks the evidence, makes the offers like-for-like, then decides within the margin floor.

1. The request

ETG selling price (EUR)	462,37
Competitor price reported (EUR)	444,34
Room nights	3
Same room type?	Yes
Same dates?	Yes
Screenshot provided?	Yes
Screenshot age (hours)	19
Our meal plan	Breakfast
Competitor meal plan	Breakfast
Our cancellation policy	Free cancellation
Competitor cancellation policy	Non-refundable
Competitor price includes taxes?	Yes
Our net cost from the supplier (EUR)	445,35
Cheapest alternative supplier net cost (EUR, blank if none)	

2. Rules (parameters)

Margin floor (on selling price)	4,0%
Breakfast value per guest-night (EUR)	12,00
Guests per room	2
Taxes to add when excluded	10%
Value of free cancellation vs non-refundable	8%
Max screenshot age (hours)	48

3. Checks and decision

Evidence complete? (same room, same dates, screensh	Yes	Without evidence we ask for details before any price change.
+ Taxes the competitor left out (EUR)	0,00	A price without taxes is not comparable: add them back.
+ Value of our breakfast (EUR)	0,00	Our rate includes breakfast, the competitor's does not.
+ Value of our free cancellation (EUR)	36,99	A non-refundable rate is cheaper because the guest takes the risk.
Competitor price, like-for-like (EUR)	481,33	What the competitor would charge for our product.
Real gap (EUR)	-18,96	Positive = we are really more expensive.

Lowest price that keeps the margin floor (EUR)	463,91	Net cost / (1 - floor).
Maximum discount allowed (EUR)	0,00	Selling price - floor price.
Price at the floor with the alternative supplier (EUR)		Can another supplier let us match?
DECISION	**Refuse**	
Discount to grant (EUR)	0,00	We match the like-for-like price, not more.
Margin rate after decision	3,7%	Must stay above the floor.

4. Reply to the partner (template, filled automatically)

Thank you for flagging this. We checked the offer: it is not the same product. Our rate can be cancelled free of charge, theirs is non-refundable (worth about EUR 36,99). Compared like-for-like, our price of EUR 462,37 is the better offer, so we keep it.

Pricing recommendations within the current model

B2B hotel segments, last 90 days. Rule: hold near the floor, -0.5 pt where valid price-match pressure is high and growth weak, +0.5 pt where pressure is low and growth strong.

Price elasticity, prudent case	-1
Price elasticity, severe case	-3
Margin floor	4.0%

Expected 90-day margin effect (EUR), prudent / severe elasticity

+3 371 +2 641

Elasticities are assumptions (range), to be validated with a price test | SIMULATED data (seed 42), not Emerging Travel Group data. Independent case study based on public data - not affiliated with or endorsed by Emerging Travel Group.

Data quality first

SIMULATED DATA

Checks run on the raw ledger before any conclusion (src/analysis.py, sql/06_data_quality_checks.sql).

SIMULATED data (seed 42), not Emerging Travel Group data. Independent case study based on public data - not affiliated with or endorsed by Emerging Travel Group.

issue	date_from	date_to	scope	rows	effect	action
Duplicated bookings	21/07/2026	21/07/2026	Channel API	152	Day sales overstated by +27% (EUR 53,393)	Removed duplicates on booking_id; ask data engineering to fix the load
Missing net cost	03/08/2026	09/08/2026	Supplier SUP-WS-A	124	If read as zero, total margin rate shows 12.5% instead of 7.6%	Cost imputed with the supplier's markup of the previous 28 days, flagged; supplier invoice to be reconciled
Time-zone shift in a feed	12/10/2026	18/10/2026	Channel API	60	Timestamps +5 h: 60 bookings counted on the wrong day	Shifted back 5 h for the window; feed owner to send UTC
Sold below net cost (business alert, not a data error)	01/05/2025	31/10/2026	All bookings	1498	29% of them on SUP-FL-A	Sent to pricing: selling price below net cost after a supplier rate change or a discount
Selling price <= 0			All bookings	0		Check passed
Check-in before booking date			All bookings	0		Check passed
Cancellation before booking date			All bookings	0		Check passed
Missing FX rate			All bookings	0		Check passed
